Investigation of Exfoliation and Intercalation in Clay Nanocomposites

Ali D.

Abstract:
In this study the effect of filling of clay nanoparticle in the polymer base composite and the intercalation, exfoliation ... completed exfoliation of silicate layers is the fundamental to reaching polymer/clay nanocomposites that perform well.

Key words: Exfoliation & Intercalation,

A Ringed Contact Friction and Boundary Lubrication Test instrument design

Rahman A. and Memedov B.

Abstract:
A simple, inexpensive, easy to use, and very accurate annular contact friction and boundary lubrication tester is ... well suited for simulating and studying the surface contact phenomena which arise in multiple disc brakes and clutches.

Key words:
Keywords: Ringed contact, Friction, Boundary Lubrication

Performance Improvement Priorities: Integrative Model of Organizational Excellence Model and BSC Approach

Original Research, A5

A New Method for Solving the Generalized Interval-Valued Fuzzy Numbers Linear Programming Problem

Original Research, A6

Mahmoodirad A., Hassasi H., Molla-Alizadeh-Zavardehi S., Esfahani M. J.

Abstract:
In this paper, we concentrate on linear programming problems in which the cost vector, the technological coefficients and the right-hand side of the constraints are represented by the generalized interval-valued trapezoidal fuzzy numbers. In this paper, we develop a method to convert such fuzzy linear programming problems into the equivalent crisp linear programming problems which can be solved by the linear programming methods. Finally, we give an illustrative example and its numerical solutions.

Keywords: Linear Programming Problem, Generalized Interval-Valued Fuzzy Numbers

Ranking Tehran Healthcare Centers based on Service Quality using Fuzzy Data Envelopment Analysis

Original Research, A7

Tabatabaei Mehrizi S.M.

Abstract:
The customer is one of the most effective environmental factors in health services organizations. Experts of management of Tehran’s health organizations have been working well to improve their services. In this paper, the Tehran-based clinics were selected. These clinics were then ranked regarding the quality of their services using DEA.
